

BENJAMIN IDOKO EMMANUEL

PRODUCT DESIGNER | DIGITAL PRODUCT DELIVERY | PRODUCT LEADERSHIP

Abuja, Nigeria | benjaminemma360@gmail.com | Dribbble: dribbble.com/BenjIs | Portfolio: benjisidoko.github.io

PROFESSIONAL SUMMARY

Product Designer and digital product delivery professional with 6+ years of experience delivering web, mobile and SaaS products across HealthTech, FinTech, Logistics, PropTech and EdTech. Combines product design, technical understanding and delivery leadership to move products from ambiguous requirements through UX/UI design, functional implementation, UAT and production handover. Experienced working with distributed and international teams across the full product lifecycle. Strong technical foundation across Figma, WordPress, HTML, CSS, CMS and SaaS platforms, with practical experience collaborating across product, design, engineering and business stakeholders.

CAREER HIGHLIGHTS

- 50% increase in clinic and patient application adoption within 12 months through cross-functional product delivery and alignment with user needs.
- 30% reduction in project iteration delays through stronger requirements gathering and backlog grooming.
- 100% on-time delivery across an international portfolio of web projects from discovery through deployment.
- 30% reduction in manual dispatcher monitoring through a redesigned operational interface and automated reporting workflows.

PROFESSIONAL EXPERIENCE

TRACIFY LOGISTICS

Lead Product Designer | Jan 2025 – Jul 2025

- Reduced manual dispatcher monitoring by 30% by redesigning the operational interface and introducing automated reporting workflows.
- Designed a platform integrating real-time truck tracking and fuel telemetry to support enterprise-scale fleet visibility across international borders.
- Delivered driver-monitoring capabilities aligned with local transport requirements to improve operational control across multiple jurisdictions.
- Translated complex tracking, telemetry and operational requirements into a unified digital experience with product, engineering and operations stakeholders.

ROCKCITY CONSULTING

Web Designer | Jan 2023 – Jul 2024

- Delivered an end-to-end EdTech website for a Canadian-based company, from ideation and information architecture through UX/UI design, development and deployment.
- Built a WordPress CMS content architecture using custom content and post types rather than relying only on a pre-built template.
- Translated Agile and Scrum learning requirements into a scalable digital experience and coordinated remote stakeholder feedback through production.
- Improved content flexibility and maintainability through reusable content types and CMS-driven publishing workflows.

NEXMOVE TECHNOLOGIES

Technical Lead | 2021 – 2023

- Maintained 100% on-time delivery across an international portfolio of web projects by managing discovery through deployment and coordinating dependencies across teams.
- Managed scope, milestones, requirements and stakeholder expectations; led UAT and supported production handover across client projects.
- Reduced delivery friction across distributed teams by translating business needs into actionable technical and design requirements.

CROWDFORCE NOW FAIRMONEY

Product Designer – Contract / Side Engagement | 2022 – 2023

- Led product-design initiatives across the digital product development lifecycle, translating user and business requirements into practical interface solutions.
- Worked with product and development stakeholders to support design-to-development execution and improve consistency across product experiences.
- Contributed product-design support in a fast-moving FinTech environment while maintaining the engagement alongside primary professional responsibilities.

PRIMED E HEALTH

Project Lead | 2018 – 2020

- Increased clinic and patient application adoption by 50% within 12 months through cross-functional product delivery and user-focused execution.
- Reduced project iteration delays by 30% through more rigorous backlog grooming and requirements-gathering sessions.

- Coordinated remotely with an India-based development team to align product objectives, business goals and delivery priorities across healthcare technology initiatives.
- Led network infrastructure, cybersecurity and IT support activities for the Faantaxi solution, and designed a user-focused mobile interface for Thrifty.
- Managed product requirements, delivery priorities and stakeholder communication across healthcare technology initiatives.

SELECTED PRODUCT PROJECTS

Builders Pool - Construction Procurement Platform

Product Designer · Product Development · 2026

Designed and built a digital construction-materials procurement platform with account creation, material discovery, catalog browsing, procurement, order tracking and fulfillment workflows. The customer experience supports fixed pricing while pooled demand and supplier bidding operate behind the scenes. Designed experiences for regional fulfillment centres, site delivery and material procurement workflows, taking the product from concept through functional web implementation. Live product: [builderspool.vercel.app](#)

CNG Connect - CNG Station and Driver Platform

Product Designer · Product Development · 2026

Designed and built a digital experience focused on CNG infrastructure discovery, location-based information and driver-focused accessibility from concept through functional web implementation. Defined the information architecture and interface experience to make location-based CNG information easier to discover and use. Live product: [cngconnect.com.ng](#)

TTC Ushafa - Church Digital Platform

Product Designer · Web Product Development · 2026

Designed and built a modern, responsive web experience for The Transforming Church Ushafa, including information architecture and a visual system aligned to its content, communication and engagement needs. Applied responsive UX principles to create a consistent experience across desktop and mobile contexts. Live product: [ttcushafa.vercel.app](#)
